

IT Trainee: Java Developer
Full-Time

GA-Atlanta
<https://careers.nscorp.com>

JOB DESCRIPTION:

Entry level JAVA DEVELOPER (Web and Mobile Development)

SKILLS REQUIRED:

- Experience or coursework developing applications in an object oriented architecture
- Strong problem solving skills
- Understanding of Relational Databases
- Familiarity with Java and JavaScript
- Familiarity with UNIX or Linux
- Familiarity with testing methodologies and strategies, strong teamwork ethic and customer support focus, excellent verbal and written communication skills

The Norfolk Southern Information Technology Department is currently seeking an entry level application developer to join a dynamic development/support team in our beautiful Midtown offices in Atlanta, GA. This position provides the opportunity for the individual to be involved with development of a variety of enterprise web and mobile applications and with existing systems enhancements to help facilitate train operations and other company objectives. Other responsibilities may include support, trouble-shooting and problem resolution skills.

What you need for the position:

- A bachelor's degree (preferably in Computer Science, Engineering, Math or related field)
- A solid grasp of web, mobile or backend application development
- Knowledge and experience in some of the following areas: Java, J2EE, JavaScript, HTML, Ajax, CSS, XML, SQL, DB2, Oracle, MS SQL Server, Unix, Web Services, EXTJS, HTML5 Mobile Apps, Sencha
- A passion for technology, problem solving and innovation. The kind of person that also embraces teamwork with their peers and customers.

What you'll be doing:

- Creating and maintaining web and mobile applications that will integrate with different technologies
- Interfacing with customers, business partners, IT team members to resolve business issues
- Enhancing unique and exciting systems that support business operations including train management and control systems, geographic information systems and maps, complex event management, customer support systems and operational optimization systems.

What's in it for you:

- \$60,000 per year starting salary
- Work in a friendly environment for a STABLE Fortune 500 company
- Beautiful Midtown office within walking distance of MARTA
- Possible telecommuting
- Onsite day care facility

Developer Internship

Part-Time

GA-Atlanta

<https://www.smartrecruiters.com/BluetubeLLC>

Job Description

Bluetube is looking for Mobile Developers, Web Developers, an End-to-end Developer for an exciting internship. As a team we build the UI, the business logic and database to support it. The ideal candidate loves to program, reads coding blogs, tries new languages and frameworks just to play with them. As a developer intern, this position will have the candidate placed in a development team, where the individual will be trained and mentored by all existing members of the team.

Responsibilities:

Design/build/deploy web and mobile applications

Learn and teach new development technologies, especially mobile technologies

Be knowledgeable on web technologies, helping guide internal and external discussions on implementation

Work with Bluetube teams and their clients on software development projects

Qualifications Requirements:

Currently pursuing a Bachelors in Related Field (Computer Science, or similar Technology Field)

Experience with object-oriented languages including either .NET, PHP, or Java

Experience with front-end development - HTML, Javascript (jQuery), CSS

Familiarity with back-end development - Databases (strongly preferring SQL Server, but will consider Oracle, MySQL, MongoDB experience)

Understands responsive web development

Additional Information

What You'll Get

1. Freedom: We trust you to do your thing and do it well.
2. Great Opportunities: We give you the tools & guidance you need to be successful and grow within our company.
3. Thriving Company Culture: Enjoy your days in a great atmosphere with coworkers who are just as passionate as you with frequent company events!
4. Perks: Work on highly visible projects, attend sponsored company events, bring your dog to work day, receive fun company swag, and wear relaxed work attire.
5. Benefits: Competitive Pay, Vacation Pay, Medical & Dental Insurance, a flexible & fun working environment, and fantastic hands-on learning opportunities.

Our Values

- Passion: We love what we do and feel ownership in everything accomplished. We constantly push the envelope and have fun doing it.
- Integrity: We do things the right way, not necessarily the easy way.
- Fearlessness: We embrace innovation and are fascinated with what we can do with it. The love for learning is essential.
- Celebration: We celebrate your wins, whether it is exceeding client expectations or being an awesome team member!
- Teamwork: The best results come from collaboration. We care – a lot – about our teammates and our clients.

Bluetube provides equal employment opportunities (EEO) to all applicants for employment without regard to race, color, religion, sex, national origin, age, disability or genetics. In addition to federal law requirements, Bluetube complies with applicable state and local laws governing nondiscrimination.

Required experience:

Responsive websites preferably with mobile app development: 1 year

UI Designer (Remote / Work from Home)

MELEWI

THE TRAVELLING
DIGITAL DESIGN STUDIO

We're a travelling design studio working with passionate people from around the world.

Conference calls with clients located around the world are just another day at the office for us – wherever that may be. We work remotely from San Francisco, Melbourne, Singapore and anywhere a plane can take us.

Our view is global: we travel to be inspired, gain perspective, and build products and businesses that speak to everyone, everywhere.

<http://melewi.net>

<https://medium.com/@melewi/-fb5b70bd2072>

We don't believe in being stuck in a boring 9-to-5; clocking in and clocking out. We believe that a job you love is a job worth doing. We work with purpose and meaning—for ourselves, and for our clients. (Also, we really f*cking love building kickass products.)

If you're a UI designer interested in being part of a constantly evolving team, with the freedom to travel and work remotely, keep reading. Melewi is building a team of kickass designers to be based anywhere on the globe (timezones GMT +6 to GMT +12).

We work with exciting startups from around the world and also with international brands like Heineken, Samsung and McDonald's. We'll have fun, learn as we go, and create some damn amazing work! This is your opportunity to learn, create, and work towards your big goals, whatever they may be. We give a lot of trust to the right people, and that means you'll find yourself often in the driver's seat, helping us steer the company towards greatness.

What does working with us look like?

- **We're agile & always learning**—We toss what doesn't work and improve what does. We believe that there is no 'best', only 'better'.
- **We're flat**—Communication is open between everyone regardless of position, gender, age or nationality; suggestions for improvement are open to all.
- **We're ambitious & proactive**—We've got big dreams, and we work hard and fast (and yes, we break things) to achieve it. Taking initiative is the standard. The business is in everyone's hands, not just a select few.
- **We're flexible**—While we don't compromise on the important things (work, culture, attitude, progress), we leave the less important things up to you (like where you want to work from, what you wear, and what times you want to work (with some stipulations)).
- **We're in this together** and most of all, **we're fun!**—We're aligned in our values, vision and goals and work together as a family. Work takes up too much of your life to not enjoy what you do. While we take our work seriously, lots of laughing can be expected too.

What does the right person look like?

You'll have prior working experience in UI for products (webapps / mobile apps), as well as the need to be constantly learning and growing. Any basic knowledge of business and / or programming is valuable, and we're keen to find someone with experience in startups, as well as is familiar with lean & agile working methodologies.

You'll be responsible, proactive, innovative, eager to learn, and meticulous. A good sense of humour is a must. And if you're the type to bring tasty treats to share, we welcome you with open arms!

What skills and traits are we looking for?

- A strong background of at least 2 years in UI design
- A thorough understanding of how to design intuitive digital experiences for websites, web apps, mobile apps (site functionality, interaction, site architecture, user interfaces and navigation).
- Knows how to execute all visual design stages from concept to final hand-off
- Must have the ability to articulate and defend design decisions, but appreciate constructive feedback
- Experienced in how to build an awesome product.
- Start-up minded.
- Experienced working with lean and agile methodologies, as well as the ability to adapt to various processes (we're constantly trying to improve our processes and are open to change, so you'd have to be too!).
- The ability to work on and lead multiple projects, and also to work closely with the team, clients and contractors.
- Possesses great presentation and communication skills.
- Takes initiative, and is a self-starter.
- An awesome attitude + no ego + team-player (no lone wolves).
- Constantly learning and sharing knowledge + seeks out & appreciates feedback.
- Proficiency in design and prototyping tools such as Photoshop, Sketch, Balsamiq, Invision, etc.

Interested? Check out our Melewi values to see more about what we stand for and live by.

iOS Software Developer (Remote / Work from Home)

FL - Sarasota
www.indeed.com

POSITION DESCRIPTION

Voalte Engineering is looking for an iOS software developer. We want people who don't just crank out code, but know what the right code is and who can bring a unique viewpoint to design and engineering. We want someone who would like to learn and grow while helping build mobile medical communications apps so doctors and nurses can communicate easily and focus on their patients. We care about what you can build with us.

WHAT YOU'LL DO

- You'll do iOS development using Agile methods in Objective C with Xcode.
- You'll be part of a team of cooperative team of engineer, UX designers, and product managers.
- You'll help deliver our large, robust & reliable networked communication software system to the hospital environment.
- You will help envision new features and new products.
- You will work on OSX and Linux.
- You'll work with flexible arrangements either remotely or in the office.

WHAT WE'RE LOOKING FOR

- You've shipped an iOS app using Objective C (or Swift) (please send the iTunes links if it's still in the store).
- You know and can use Objective C, Xcode, Linux, and git.
- You can work with others easily either remotely or in the office.
- You can communicate well in text and speech, and can speak English.
- You know networking beyond just using HTTP and JSON.

WHAT WE'RE LOOKING FOR: BONUS ITEMS

- You have worked with JIRA, Confluence, and BitBucket.
- You're a wizard of iOS development and have written and shipped complex iOS apps.
- You have experience with any of Erlang, Swift, JS, Python, or Java.
- You have repos on GitHub (please send links!).
- You have done TDD, CI, or automated testing.
- An engineering or CS degree is useful, but is not required.

WHAT YOU GET?

- Full medical, dental and vision coverage for full-time employees!
- A reasonable work schedule with paid vacation and major holidays off.
- Remote work possible, or work in Sarasota, FL (near Siesta Key Beach)
- Company-issued Nerf gun for your protection.
- Best of all, a chance to help make an impact by setting the standard in healthcare communication!

ABOUT VOALTE

Voalte develops smartphone alternatives that simplify caregiver communication. As the only company to offer a comprehensive Mobile Communication Strategy, Voalte enables care teams inside and outside the hospital to access and exchange information securely. Voalte customers benefit from a solid smartphone infrastructure that supports their existing systems and expands to accommodate future technologies.

Founded in 2008, Voalte is a privately held company based in Sarasota, Florida. Over 35,000 caregivers use Voalte products every day. For more information, visit voalte.com or follow @Voalte on Twitter.

OUR MISSION

Passionate and wildly talented people reimagining healthcare communication to bridge the gap between technology and care.

OUR VISION

To create life-changing healthcare communication tools.

Voalte \$6M Business Expansion

<http://www.ise.ufl.edu/blog/2012/10/voalte-plans-6m-business-expansion/>

Mobile App Developer, Support Virtual/Remote

<https://xamarin.com>
<http://xamarin.com/jobs/oO7b1fwR/Indeed>

We're global.

We have offices in San Francisco, Boston, London, Århus, and Buenos Aires, and employees in 15 countries.

Your Role:

As a Mobile App Developer on the Customer Support team, you'll be the first point of contact with Xamarin's customers. You'll work closely with product engineers and guide customers from a potential problem to a successful solution, delighting customers in the process.

Key Responsibilities:

Work through support cases and prioritize cases appropriately

Write sample applications to investigate potential bugs and issues within Xamarin Studio/Visual Studio with Xamarin.iOS and Xamarin.Android

Work with customers to help them achieve their goals using Xamarin technologies

Monitor issues on the Xamarin Mailing Lists, Forums, as well as other public channels such as StackOverflow

What We're Looking For:

Sample artifacts of your coding acumen, examples include: GitHub projects, or other open source participation, sample bug reports filed, Stack Overflow reputation, technical Blog

Xamarin.iOS and Xamarin.Android experience preferred but not required

A strong interest in building mobile apps on iOS or Android and proficiency with C# and .NET (or a demonstrable willingness and ability to learn quickly)

Excellent written communication skills

Ability to adapt to different scenarios because everyday is different!

Why join us

Xamarin was voted one of San Francisco's "Best Places to Work" by the San Francisco Business Times. Join a fun team at a fast growing start-up and be part of the mobile revolution – the fastest growing movement in the history of computing. You will work with some of the best leaders and technical minds in the mobile space.

We'll provide you with a:

Competitive salary

Stock options in a fast-growing company

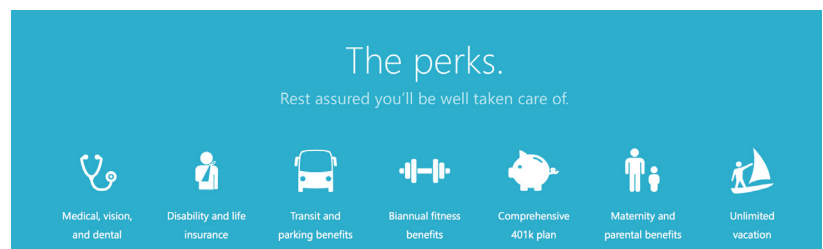

Generous referral bonus

About us

Xamarin is on a mission to make it fast, easy and fun to deliver great mobile apps. Founded in May 2011, Xamarin is the world's leading mobility platform in a market estimated to be \$3.7B by 2018[1] with offices in San Francisco, Boston, London, Århus and Buenos Aires. Over 1 million developers have downloaded Xamarin and our global customer base in 120 countries includes Dow Jones, Honeywell, Tesco, Bosch, Siemens, Thermo Fisher, McKesson, Microsoft, Kimberly-Clark, 3M and NBC Universal.

With Xamarin, Businesses are able to use their existing teams and code to go mobile, and deliver high-quality, high-performance native apps in a fraction of the time and cost of other mobile development methods. Xamarin Test Cloud has the largest device cloud on the market, enabling businesses to test any native or hybrid app on over 1,500 devices. Xamarin Insights helps enterprises find and fix issues with live users very quickly.

We have aggressive plans for further international expansion and new product offerings that delight developers and mobilize the enterprise.

<https://pro.upwork.com>

About Upwork Pro:

Upwork Pro is a premium talent program for mobile development on Upwork -- the world's largest marketplace of freelancers. With Upwork Pro we find the top 1% of mobile developers on our platform and provide them with a selected feed of world-class clients looking for top talent. Developers on Upwork Pro set their own hourly rates and choose which projects and clients to work with. Upwork Pro helps you ensure that the clients and projects are worth your time and interest. This lets you spend less time finding projects, and more time building apps and maximizing your business.

Opportunity Description:

Are you a rockstar Swift and/or Objective-C developer? Do you appreciate the flexibility of completing projects from anywhere in the world? We're looking for expert devs to handle the development and maintenance of iPhone, iPad, and Apple Watch apps for top notch clients. Your primary focus will be the development of iOS applications and their integration with back-end services, although some projects may require you to handle all technical aspects, including utilizing various third-party APIs and solutions like Parse. In some cases you'll be the sole engineer helping a growing startup, while on many other projects you will be coding alongside other engineers and developers working on different layers of the application and supporting infrastructure. In all cases a commitment to collaborative problem solving, sophisticated design, and the creation of high quality, scalable code is essential.

By joining Upwork Pro, you'll have the opportunity to work on many client projects ranging from small start-ups to world-recognized tech industry leaders.

Please note: this is a remote freelancing opportunity that can be done from anywhere in the world.

Responsibilities:

Design and build applications for the iOS platform using Swift or Objective-C.
Ensure the best possible performance, quality, and responsiveness of applications.
Collaborate with a team to define, design, and ship new features.
Build scalable code while Identifying bottlenecks and bugs, and devising solutions to these problems.
Help maintain code quality, organization, and automation including implementation of unit tests.
Keep up to date with the state-of-the-art of iOS development

Requirements:

- Proficient with Objective-C or Swift and Cocoa Touch.
- Experience with iOS frameworks, such as Core Data, Core Animation, etc.
- Experience with offline storage, threading, and performance tuning.
- Familiarity with RESTful APIs to connect iOS applications to back-end services.
- Understanding of Apple's design principles and interface guidelines.
- Experience developing, releasing, and maintaining native iOS applications
- Knowledge of other web technologies and UI/UX standards.
- Proficient understanding of code versioning tools, such as Git, Mercurial, or SVN.
- Be responsible, communicative and open to feedback
- Ability to work in areas outside of your usual comfort zone and get things done quickly

SC - Mrytle Beach/ Remote

<http://www.pcpitstop.com>

https://careers.stackoverflow.com/jobs/98867/entry-level-software-developer-work-at-home-pc-pitstop?utm_source=workingnomads.co

General Summary

PC Pitstop is hiring an entry level software developer. You will be part of an elite team that produces PC Matic, PC Matic Pro, PC Matic MSP, and Tech Sentry.

All of our products are cloud based and the development team is responsible for the back end databases that feed the products and our cloud based reporting structures.

Although the position is entry level, we can recognize and promote and increase competition based on increased responsibility and the value of the contributions to our development goals.

Qualifications

We are looking for good developers that require little management and yet still pound out high quality work. You should have good Javascript and SQL skills. C++ and Objective C are a major plus but not a requirement.

The most important attributes in this position is to be independent, smart and hard working. We don't have many meetings, or deadlines, so almost all of your time is on getting out good code quickly.

Compensation

PC Pitstop is a virtual company, and we have many uncommon benefits. Upon receiving an offer letter, you will receive a company credit card. On that card, please charge any of the following:

Internet and cable TV expenses (if purchased on a package)

Cell phone

VOIP and business landlines

Doctor and prescription co-pays

Gym membership

Travel expenses

We hold a company meeting twice a year in a different city in the United States. It is usually 8 days of travel per year and is mandatory.

Our health plan is Blue Cross Blue Shield full medical with options for dental.

Vacation is 2 weeks a year and 3 weeks after 5 years. We have the standard vacation days (New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving, and Christmas).

This position pays \$3500 per month. There is an annual bonus which last year averaged 30%. As a full time employee, you will also be eligible for the company's stock option plan in 2016.

About PC Pitstop

PC Pitstop is the company behind PC Matic, PC Matic MSP and PC Matic PRO software that provides superior security and maintenance for Windows and Mac computers for consumers, small business, enterprise and government agencies. We sell our products primarily in the United States, the UK and Japan. PC Matic is best known for its television commercials aired on cable news stations such as Fox News, CNN, CNBC, MSNBC, and Headline News.
